

High Angle Rescue

Pole Top

Course Code: 6653 | Duration: 8 Hours

Course Overview

- Wood pole fall restricting review
- Rescue requirements overview & regulations
- Human dynamics
- Rescue planning
- Rescue principles
- Descent control devices
- Lowering techniques
- Counterbalancing techniques

Course Description

This one-day program specifically addresses the potential need for rescue of a worker suspended from a wood pole. Specifically, the course will address possible situations of an injured or incapacitated worker.

Using mannequins as victims, students will learn and practice the techniques required to raise, disconnect and lower the victim safely without the use of cutting systems or other more dangerous rescue methods.

Students will enjoy the practical nature of this program and will gain confidence in knowing that they could quickly and safely rescue a co-worker if required.

Course prerequisite: 6218 Fall Protection Comprehensive
